

## How to install a font in your PC

1. Get the font (letter) installed from respective programmer /website.(Each website has got its font, usually).

Eg. Deepika: <http://deepika.com/font1.htm>

manorama : <http://www.manoramaonline.com/mmfont/Manorama.ttf>

Mathrubhumi: [http://www.mathrubhumi.com/new09/Meera\\_04-2.ttf](http://www.mathrubhumi.com/new09/Meera_04-2.ttf)

Mangalam: <http://mangalam.com/fontdownload.php>

Kaumidi: <http://news.keralakaumudi.com/beta/info/thoolika.ttf>

2. Remember the folder where the files are downloaded.

3. After the installation click : 

4. Then  (Settings / Control panel in English)

5. open   / Font (in English)

6. Open the folder where you downloaded the fonts. Select all the fonts and cut them.

7. paste them to the Folder   /(fonts Folder – in English)

8. Now you can open the site. And you can read them normally.
